## Summary

I'm a self-taught, detail-oriented, and logically thinking Test Engineer with experience in test automation, end-to-end testing, and IT infrastructure support. With a strong foundation in hardware and system administration, I transitioned into software testing, specializing in Playwright, JavaScript, and CI/CD pipelines.

I thrive on problem-solving and achieving results—unfamiliarity with a technology has never been an obstacle, only a challenge to overcome. My broad skill set extends beyond testing, allowing me to adapt quickly and contribute across different areas.

In my free time, I experiment with various environments and automation setups in my home lab, built from repurposed old desktops. I'm always open to new opportunities and eager to explore innovative solutions.

## Experience

<b>Associate QA Engineer</b>	Kainos for DVSA	10/2024 - Present
<ul style="list-style-type: none"><li>◦ Implementing Playwright for mobile emulation and E2E testing on physical android devices.</li><li>◦ Supporting the team in developing and executing automated end-to-end tests.</li><li>◦ Ensuring high-quality test environments for both emulation and real-device testing.</li><li>◦ Collaborating with developers to enhance test automation and coverage.</li><li>◦ Contributing to the overall test strategy and improving testing workflows.</li></ul>		
<b>Trainee QA Engineer</b>	Kainos for DVSA	06/2023 - 10/2024
<ul style="list-style-type: none"><li>◦ Implemented test platforms and prepared test environments.</li><li>◦ Conducted manual API testing and analyzed results.</li><li>◦ Wrote and executed Playwright E2E tests (TypeScript) and performance tests (Scala Gatling).</li><li>◦ Responded to user tickets and demoed solutions to stakeholders.</li></ul>		
<b>LAB Support Technician</b>	ManpowerGroup for Intel	10/2021 - 06/2023
<ul style="list-style-type: none"><li>◦ Led project support initiatives and provided technical assistance.</li><li>◦ Managed IT infrastructure, troubleshooting hardware and software issues.</li><li>◦ Coordinated system deployments, updates, and technical improvements.</li><li>◦ Prepared and maintained test environments, performed acceptance testing.</li><li>◦ Analyzed system diagrams and contributed to process optimization.</li><li>◦ Provided technical support and troubleshooting for platform users.</li></ul>
