Summary

I'm a self-taught, detail-oriented, and logically thinking Test Engineer with experience in test automation, end-to-end testing, and IT infrastructure support. With a strong foundation in hardware and system administration, I transitioned into software testing, specializing in Playwright, JavaScript, and CI/CD pipelines.
I thrive on problem-solving and achieving results—unfamiliarity with a technology has never been an obstacle, only a challenge to overcome. My broad skill set extends beyond testing, allowing me to adapt quickly and contribute across different areas.
In my free time, I experiment with various environments and automation setups in my home lab, built from repurposed old desktops. I'm always open to new opportunities and eager to explore innovative solutions.

Experience

Associate Quality Technician ManpowerGroup for Intel Habana Labs 04/2025 - 08/2025

- Responsible for monitoring and reporting bugs/defects in tests of LLM models running on Gaudi AI accelerators
- Collaborated with engineering teams to ensure high-quality testing procedures and reproducibility of issues
- Analyzed model behavior and test logs to identify failures related to AI accelerator infrastructure
- Contributed to improving test coverage and debugging workflows for performance and stability testing

Associate QA Engineer Kainos for DVSA 10/2024 - 04/2025

- Implementing Playwright for mobile emulation and E2E testing on physical Android devices
- Supporting the team in developing and executing automated end-to-end tests
- Ensuring high-quality test environments for both emulation and real-device testing
- Collaborating with developers to enhance test automation and coverage
- Contributing to the overall test strategy and improving testing workflows

Trainee QA Engineer Kainos for DVSA 06/2023 - 10/2024

- Implemented test platforms and prepared test environments
- Conducted manual API testing and analyzed results
- Wrote and executed Playwright E2E tests (TypeScript) and performance tests (Scala Gatling)
- Responded to user tickets and demoed solutions to stakeholders

LAB Support Technician ManpowerGroup for Intel 10/2021 - 06/2023

- Led project support initiatives and provided technical assistance
- Managed IT infrastructure, troubleshooting hardware and software issues
- Coordinated system deployments, updates, and technical improvements
- Prepared and maintained test environments, performed acceptance testing
- Analyzed system diagrams and contributed to process optimization
- Provided technical support and troubleshooting for platform users

Area Sales Manager Liquider Poland 07/2020 - 09/2021

- Managed a team of 20 and supported regional IT infrastructure

Education

Uniwersytet WSB Merito Gdańsk, PL

Masters in Management 09/2021 – 03/2023

• IT project management

Bachelor of Engineering 09/2016 – 07/2020

• Degree in Engineering, thesis title *Prototype of sales system based on virtualization*

Skills

Programming Languages: JavaScript / TypeScript
Tools and Frameworks: Git (GitHub/GitLab), Docker, Playwright, Jenkins, SQL, AWS, Postman
Operating Systems: Linux, macOS, Windows
Certificates and Courses: ISTQB® Certified Tester Foundation Level, CKA & CKAD
Languages: Polish (native), English (B2/C1)
